TUFF COMPETITION EVOLUTIONS / INFORMATION

Each event must be performed in the order specified below. **NOTICE:** All evolutions must be completed before continuing to next evolution. You will be called back to complete the evolution by TUFF Staff.

START. Prior to the start signal, each competitor must be on the start pad. Following the start command, an audible signal will start each competitor/team. An early "false" start may result in a restart or a 2-second penalty, at the sole discretion of the Official. More than two (2) false starts may result in disqualification.

TASK 1: High Rise Stair Climb Evolution.

Carry a high-rise standpipe pack (2 sections of 1 1/2" hose) up to the fourth floor of the control building. The standpipe pack is to be deposited at the top of the stairs in the designated area. **NOTICE:** The designated area is a metal box located at the top of the stairs. The free hand may be used to assist in the climb by pulling on the handrails. No skipping of steps is allowed on the way down. **NOTICE:** A 2-second

penalty is assessed for each skipped stair. The competitor is disqualified if the pack falls from the fourth floor.

TASK 2: Hose Hoist Evolution.

A donut roll of 2 1/2" diameter hose and utility rope are used for this event. The competitor must stand at the rail of the fourth floor while hoisting. The evolution is complete when the roll clears the railing and is placed in the designated area. **NOTICE:** The designated area is a metal box located at the donut area. The donut roll must stay on the fourth floor. **The team is disqualified if at any time loss of control of the donut roll,** including falling off the building, or rolling down the stairs. A fallen donut roll may not be retrieved.

TASK 3: Forcible Entry Evolution.

Employing the Forcible Entry Simulator, and with a 8 pound shot hammer provided, drive the beam five feet by striking the end of the beam. No pushing or pulling is allowed. The end of the beam must be struck squarely and distinctly. Do not hit the handle on the beam. This event is completed when the end being driven crosses the five-foot line. The hammer must be placed in the designated spot. **NOTICE:** The competitor may stand on the Keiser while waiting for the hand-off but must leave Keiser for next hand off.

TASK 4: 1 3/4 Hose Advance Evolution.

After traveling the required distance of 140 feet through the cones (**NOTICE: must go on outside of final cone**) and to the marked box (**competitors feet must be in "box" or a 5-second penalty will be added to time**) pick-up the nozzle end of the 150 foot charged 1 3/4" line and advance it 75 feet to the line (box) marked on the pavement where you will open the nozzle and hit the target. **NOTICE:** The nozzle must be fully closed and placed **in the marked box** (not dropped) before advancing to the next event. A dropped nozzle will result in a 2-second penalty.

TASK 5: Victim Rescue Evolution.

Lift and/or drag a 175-pound rescue dummy a distance of 100 feet. The dummy (and participant) must cross completely over the finish line. Webbing or a strap may be used. This event is complete when the dummy and participant clear the finish line and the horn is sounded.

EXCHANGES (TEAM RELAY ONLY) ~

NOTICE: Spanner wrench exchanges are required for team relay only – individuals are not required to carry the wrench.

You may only exchange the spanner wrench at the five designated spots on the course. You are not mandated to use all five. Competitors are required to use the event spanner wrench, which will be provided.

Exchanging must be **hand-to-hand** and competitors may elect to put the spanner wrench down after an exchange but must pick up the spanner wrench before advancing to the next event. Competitors may put the spanner wrench in their pocket. Loss of control of the spanner wrench will stop the competitor's forward progress until the member completing the evolution regains possession. Teams that have less than 5 competitors may have a member complete more than one evolution in succession, or alternatively, they may have another member interposed between the events. In any case, the handoffs must be accomplished in accordance with these rules.

Competitors have five (5) options for the exchange of the spanner wrench. The exchanges areas are listed below:

First Exchange: At the fourth floor of the control building. A legal pass takes place when all competitors' feet are on the fourth floor, following the deposit of the high-rise pack in the designated area.

Second Exchange: Between the last step exiting the tower and on the Forcible Entry Simulator.

Third Exchange: Anywhere within ten feet of the Forcible Entry Simulator.

Fourth Exchange: At the start line for the Hose Advance Evolution.

Fifth Exchange: At the start of the Victim Rescue Evolution. The competitor cannot touch dummy until they have the spanner wrench.

Any early exchange, (hoisting hose, touching the hammer, touching the nozzle, lifting the dummy before a handoff) will result in a 2-second penalty. No assistance can be rendered to a member of a team by any other member of the same team; each infraction will result in a 2-second penalty, (i.e., if a member completing a task drops the wrench, they alone must be the one to pick it up). If any object should fall off the control building (i.e. spanner wrench, donut or high-rise pack), the team will be disqualified. **No exceptions!**

Any rule infraction will result in a 2-second penalty
